

LCD PANEL FOR A SERVER SYSTEM

Abstract of the Disclosure

A cPCI server system includes a plurality of printed circuit assemblies. A server
5 management card coupled to the plurality of printed circuit assemblies monitors and
manages operation of the server system. The server management card receives and stores
status information from the plurality of printed circuit assemblies. A first LCD panel is
mounted on the server system and is coupled to the server management card. The first
LCD panel provides a user interface for configuring the server management card and
10 accessing the stored status information from the server management card.
